I AM
BECAUSE
WE
ARE

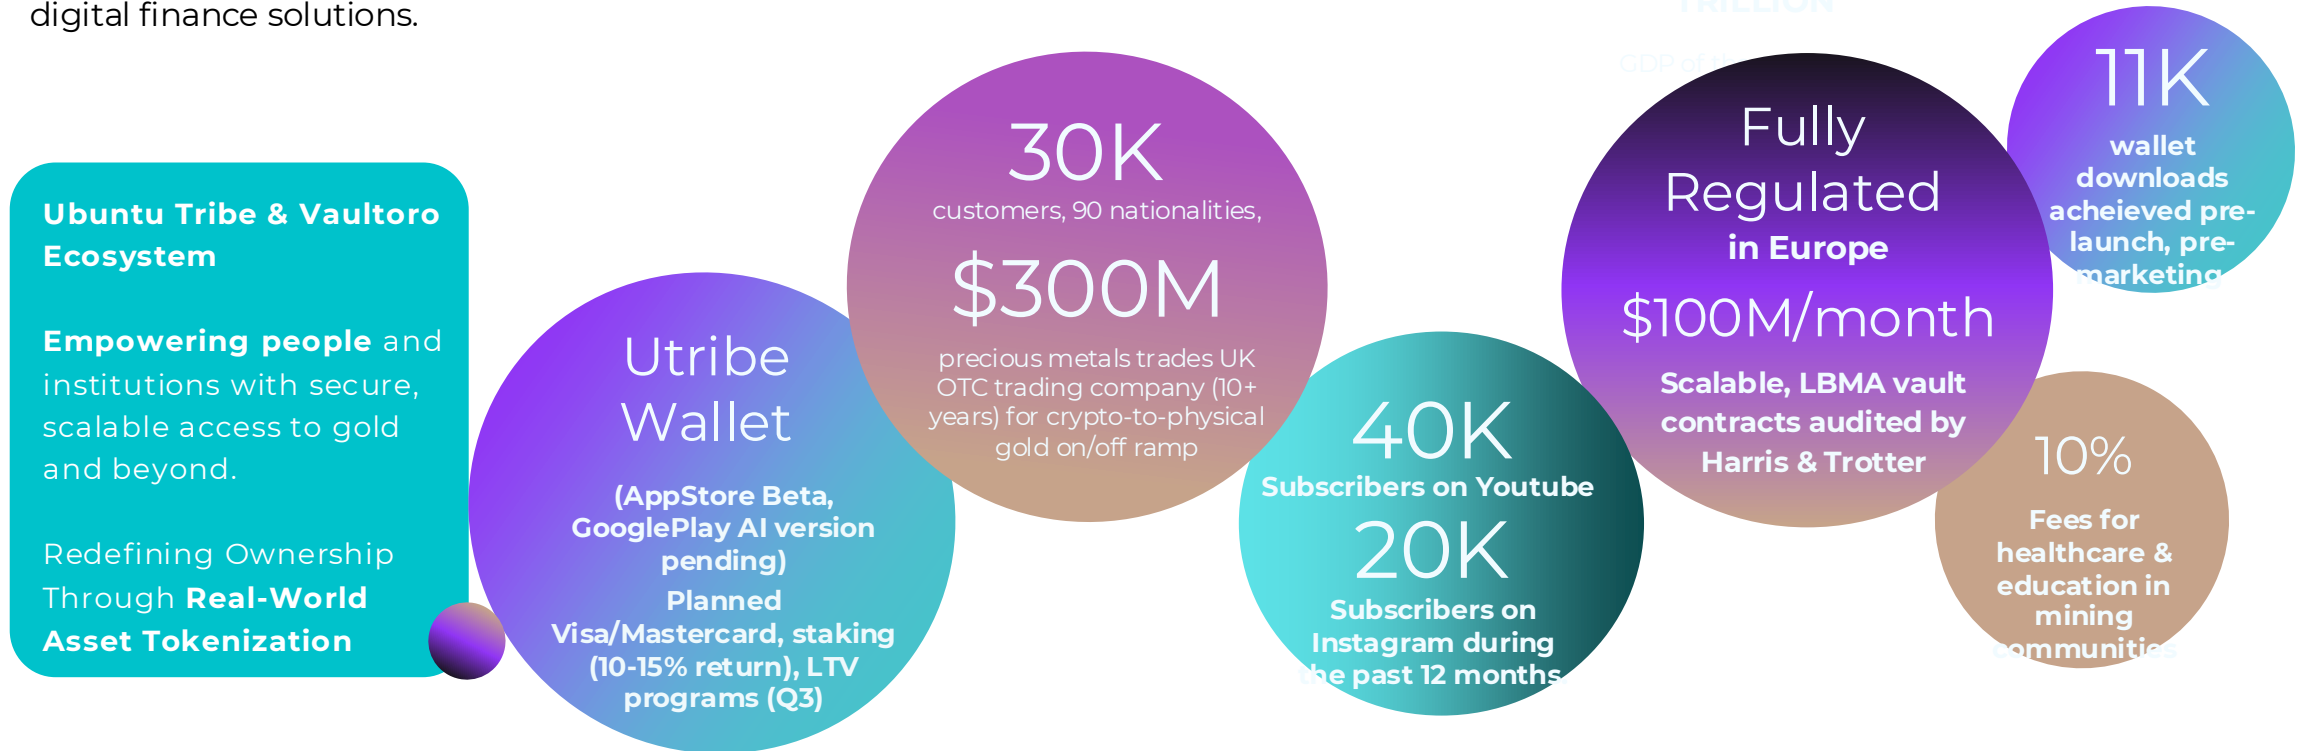

utribe.one

OUR TRACK RECORD SO FAR

Empowering global users with secure, regulated, and sustainable access to gold, real estate, and beyond through cutting-edge digital finance solutions.

The Power of Ubuntu Group

Increases market value of assets, gives data transparency, reduces risk, and encourages good stewardship

Market penetration with \$300M trading volume, in Europe, North America, Southern Africa, and emerging markets.

Low capital cost creates financing options that maintains ownership stake and allows for portfolio market cap growth

Fully regulated in Europe (Service provider license for crypto custody and exchange) & Mauritius security token exchange license.

Secures LBMA-regulated vaults in Switzerland, Germany, Singapore, Denmark, and Dubai, audited by Harris & Trotter.

Drives staking, LTV, tokenizes trillions, redistributes 10% fees for mining communities' healthcare and education with mercury-free gold.

Connecting Worlds, Cultivating Opportunities: Where Access Meets Proximity

Group holding entity (Ultimate)
Ophir Ubuntu International LLC
Mauritius

Prometheus Trading Jdoo - Croatia

Mansa Musa Intergrated Solutions – Nigeria

National Vaulting Services Ltd. - Vaultoro - UK

Ubuntu Uhuru s.r.o – Czech Republic

Imperial Gold Holdings – United Kingdom

Utribe Ghana Ltd - Ghana

Ubuntu Technologies Ghana Ltd - Ghana

UTribe South Africa - South Africa

Mansa Musa Technologies Holdings - Mauritius

Ubuntu Global Holdings – United States

The Ubuntu Investment Company – United States

Ubuntu Gold DMCC – United Arab Emirates

Ubuntu Asia Ventures - Singapore

Mansa Musa Technologies – Kenya

Mansa Musa - South Africa

KEY STRATEGIC POINTS

01

Market & Opportunity

1. Africa holds 48% of global gold reserves, but local populations lack access.
2. In-ground resources in Africa are estimated at \$160 trillion; tokenizing just 5% equals \$8 trillion in accessible assets.
3. Ubuntu Tribe uses satellite technology to certify and tokenize resources up to 5,000m deep, without physical extraction.

02

Impact Model & Distribution

1. Deployment of Gold Kiosks to buy directly from artisanal miners, offering them higher income and reducing intermediaries.
2. Redistribution of 5-10% transaction fees for community projects (schools, hospitals, etc.).

03

Regulation & Expansion

1. Ubuntu Tribe is close to obtaining a license in Dubai, opening the Middle East and Singapore markets, and owns a security token exchange in Mauritius.
2. The company is one of the few regulated gold-backed tokens, unlike Tether Gold or Pax Gold, which have been delisted in Europe.

04

Product Ecosystem

1. Quantum-enhanced wallet, one of only five worldwide, designed for institutions and governments.
2. Ubuntu Academy integrated into the wallet, with AI-powered tutorials for financial and digital literacy.
3. Planned extension to other assets: silver, lithium, platinum.

Ubuntu Tribe: Phase Breakdown

Where we are:

Ubuntu Tribe has completed the foundation and infrastructure phases: token architecture, regulatory setup, vaulting partnerships, and wallet beta are already in place.

Current phase:

We're entering the early commercial rollout: onboarding users, expanding token circulation, and initiating tokenization partnerships with sovereigns and miners.

Next steps:

The next phase will focus on institutional integration, exchange deployment, and full tokenization of real-world assets across Africa and Latin America.

WELCOME TO THE ERA OF "OPPORTUNITY ECONOMY"

With the belief "I am because we are," we strive to build a secure, innovative, and inclusive financial system for everyone.

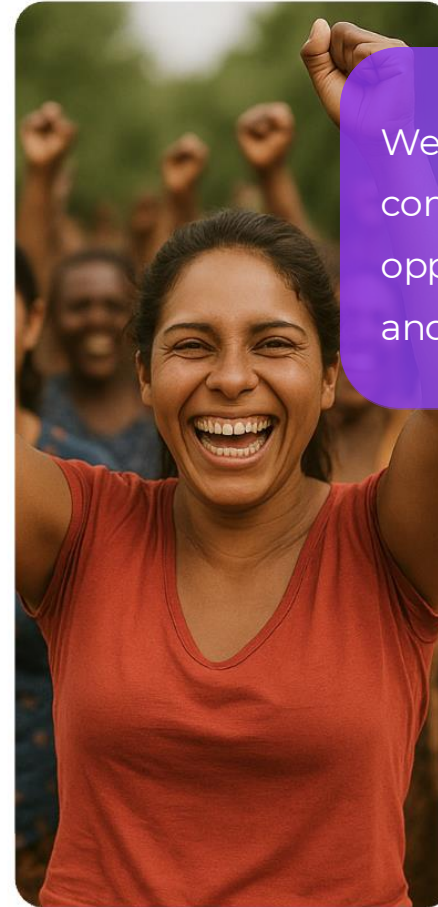

We're pioneers in tokenizing real-world assets into digital opportunities, starting with gold, through our digital gold certificate, GIFT, which is backed 1:1 by physical gold.

Ubuntu Tribe represents the future of connected finance.

Using AI and blockchain, we make it easy for anyone to create and preserve wealth from their mobile device.

Ubuntu Tribe stands for empowered humanity, ethical growth, and shared prosperity.

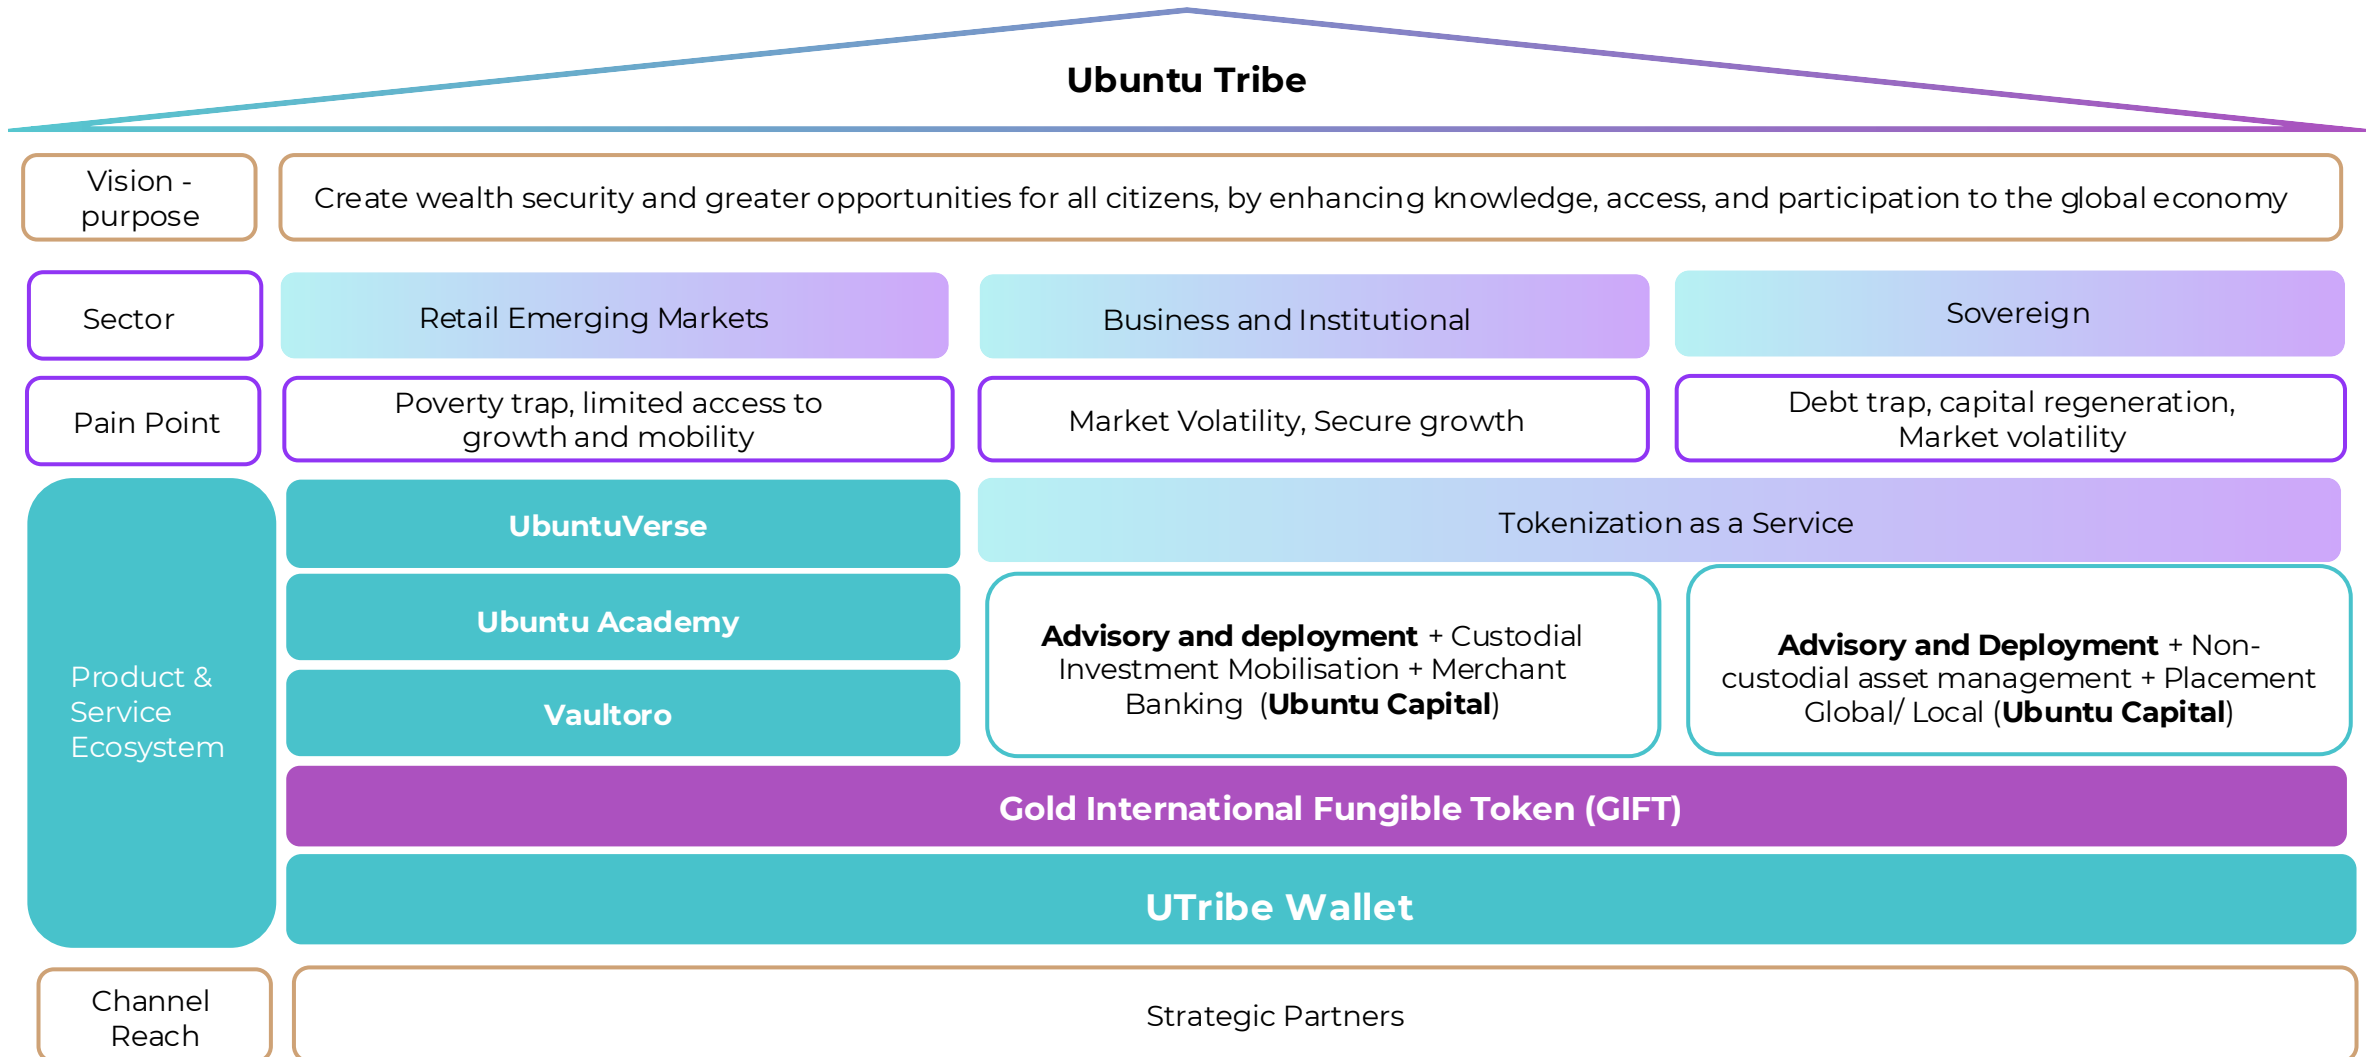

#TogetherWeRise

We believe in a world where individuals and communities can have universal access to opportunities enabled by financial freedom and interconnected humanity.

Why Ubuntu Tribe? : Transcend Financial Inclusion into Financial Mobility

Over the next decade, fintech must shift from inclusion to mobility, as 1.4 billion unbanked mostly lower middle class and bottom of the pyramid face persistent debt and poverty cycles.

"We make gold accessible to everyone through mobile and blockchain."

Tokenize Real-World Assets (RWA)

Web3 turns physical assets into blockchain-based tokens, enabling fractional ownership (e.g., a \$100,000 gold bar split into \$1 tokens). This increases accessibility, liquidity, and transparency, while smart contracts reduce intermediary costs by up to 30%.

Overcome Barriers

Web3 eliminates collateral constraints by fractionalizing assets, addressing information asymmetry with transparent ledger data, and unlocking leveraged wealth for 2.5 billion underserved people.

AI-Powered Literacy

AI to provide tailored financial literacy tutorials, real-time investment recommendations, and predictive risk models, analyzing user data to achieve up to 15% annual staking returns by Q3 2025.

THE PROBLEM – A BROKEN SYSTEM

Global Poverty & Financial Exclusion

Financial exclusion restricts access to economic opportunities, perpetuating poverty across regions.

- Approximately 1.4 billion people, with over half in seven countries, rely on informal borrowing due to limited formal financial services.
- 700 million live on less than \$2.15 daily, with one-third in Africa, where Sub-Saharan Africa accounts for half of global multidimensional poverty.

Mining & Environmental Harm

Artisanal and small-scale mining contributes significantly to environmental degradation while deepening poverty and exclusion, particularly in regions with limited regulation and access to sustainable alternatives.

- Artisanal gold mining (ASGM) emits 2,000 tons of mercury annually, the top source of global mercury pollution, damaging health and ecosystems.
- 10-15 million people, including 4-5 million women and children, are involved in ASGM, exacerbating environmental and social harm.

Lack of Financial Literacy

Widespread financial illiteracy hinders understanding of investments and risk management, trapping individuals in poverty cycles.

- This knowledge gap limits economic empowerment, especially for the lower middle class and bottom of the pyramid, amid global economic crises like high inflation and currency depreciation.

Economic Mobility: Fintech's progress hasn't delivered scalable paths to asset ownership or long-term prosperity, keeping the lower middle class and bottom of the pyramid stuck in poverty and debt.

Financial Literacy Deficit: While fintech has expanded access to finance, a lack of investment and risk knowledge prevents millions from building wealth, perpetuating debt cycles.

LICENSED, REGULATED AND TRUSTED

Ubuntu Tribe is building **one of the strongest regulatory foundations in the RWA** industry, enabling global liquidity, compliant expansion, and institutional-grade operations across **Europe, Africa, Middle East, Asia, and the Americas**.

More than a
150M
trading
volume in 4
month!

Wallet Readiness

Operating under **Virtual Asset Service Provider (VASP) license** (Czech Republic)

MiCA Regulation: being upgraded to MiCA standards by end of the year

Self-custody wallet live:

- Credit card on-ramp
- Swap
- Mobile money integration

Quantum-proof recovery system

- Biometrics
- Social login
- Seed phrase options

KYC Level 2 active:

up to \$10,000 monthly transactions, with AML checks at onboarding & redemption.

Sub-Licensing: Audit & Compliance

Africa (Multi-Jurisdiction Pipeline)

- **Nigeria:** Licensed partner (Convexity) enabling cNGN ↔ gold token swaps.
- **Kenya:** M-Pesa integration complete; CMA sandbox approval pending.
- **Ghana:** Application submitted to Bank of Ghana (sandbox).
- **South Africa:** Onboarding via regulated partner Fnr-X.

Middle East

- **UAE:** VARA license expected Q4 2025 — unlocks full GCC operations.

Asia

- **Singapore:** Automatic regulatory access via VARA licensing.

Americas

- Regulated **Security Token Exchange (Mauritius)** enabling RWA issuance across global jurisdictions.

Exchange Integration

Gold-backed token listed on 3 top-20 exchanges
→ \$2M trading volume daily.

API integration enables real-time token issuance against fiat deposits.

 Coinstore

 BitMart

 CoinGecko

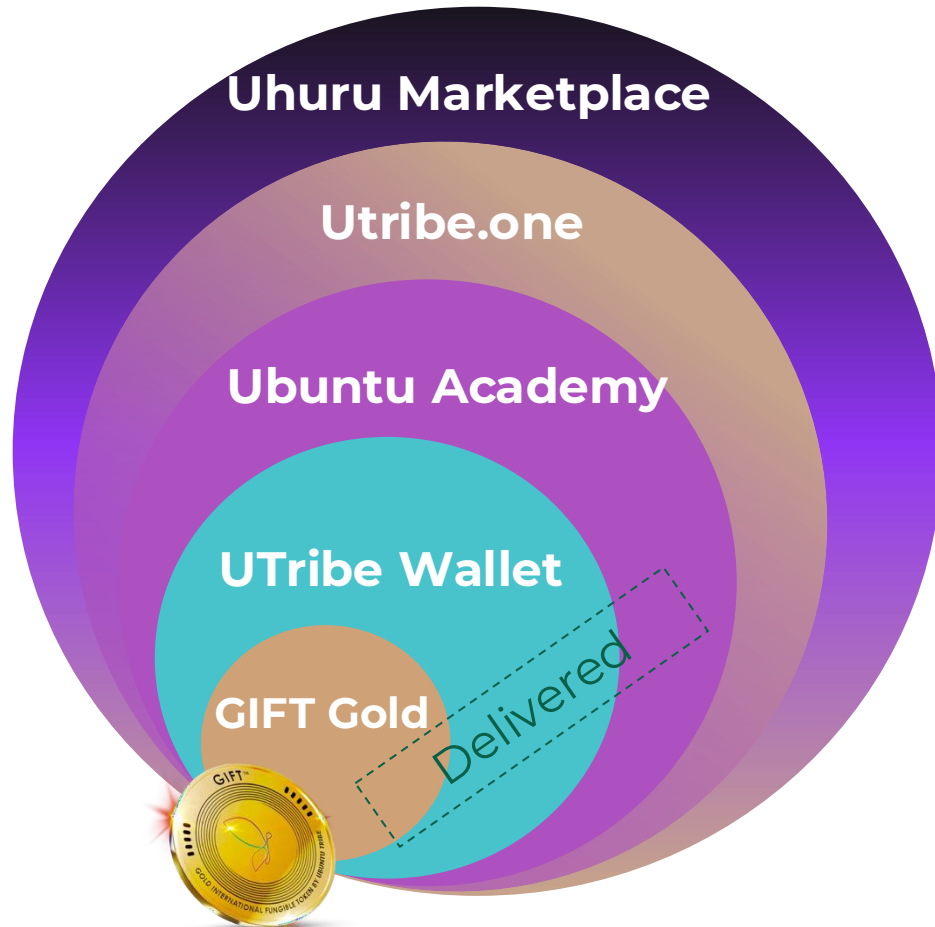

EU-regulated gold token, VARA-ready for the Middle East, MAS access in Asia, multi-jurisdiction approvals across Africa, plus our own regulated Security Token Exchange — an unmatched global regulatory stack.

UBUNTU TRIBE ORGANIZATIONAL STRUCTURE

Ubuntu Tribe Products

Empowering Futures: Bridging knowledge, access and opportunities in the Global Economy

GIFT (Gold International Fungible Token)

Digital certificate of gold ownership, backed 1:1 by physical gold and is equivalent to 1mg of Gold. GIFT can be either used as store as a value, held within the Utribe Wallet, traded into other (fiat or digital) currencies or used to transact for products and services in the Uhuru Social Marketplace and/or other accredited merchants.

UTribе Wallet

Digital Wallet accessible from Utribe.one portal, app store or google play, allows investors to:

- Purchase GIFT and other digital assets,
- Store, trade, transfer and cash out from various digital assets
- Make payments in the Uhuru marketplace.

Ubuntu Academy

Ubuntu Academy delivers gamified, high-impact education in AI, Blockchain, and Web 3.0.

- Learn to Earn: Education that drives real income and GDP growth
- Gamified Learning
- Subsidized University Programs
- Future-Ready Skills: Practical knowledge in emerging technologies

UTribе.one

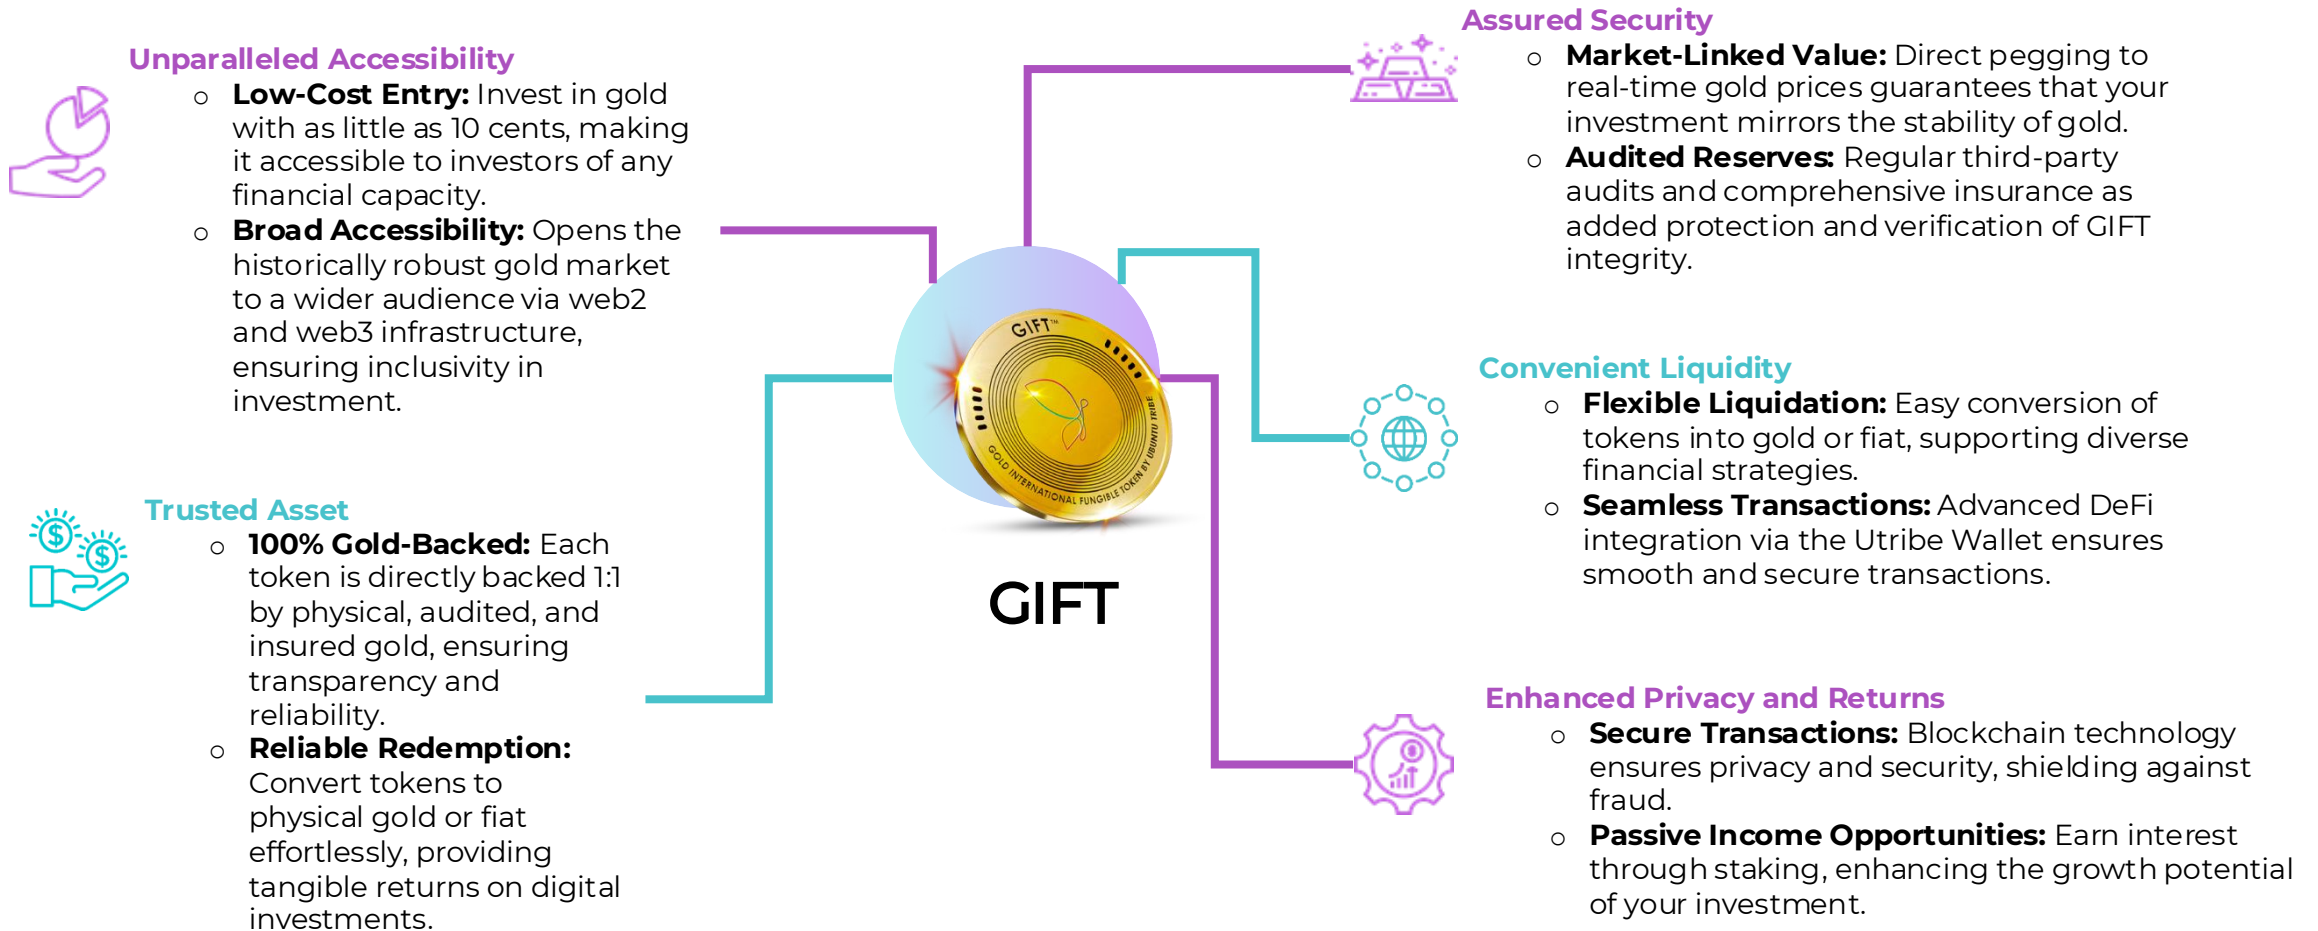

Website and portal access to Utribe wallet & Uhuru Marketplace and other services.

Uhuru Social Marketplace

Social Commerce Marketplace within the Utribe One DApp, whereby investors can trade their GIFT for products & services. Ubuntu Tribe's Uhuru platform enables seamless peer-to-peer trade.

GIFT (Gold International Fungible Token)

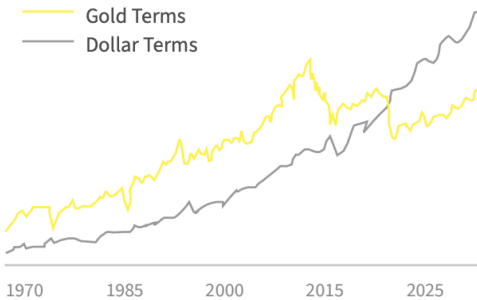

Modern. Secure. Accessible store of value.

GOLD VS FIAT - A CENTURY OF SHIFTING VALUE

As paper currencies depreciate and purchasing power erodes, gold remains the most reliable store of value across cycles, crises, and currencies.

UTribe Community

We optimize financial and social returns.

Innovative Model based on Wealth:

Creation

Redistribution

Custody

Up to 10% of Transaction Fees allocated to
UTribe Community Social Impact Initiatives.

- Ubuntu Foundation (non for profit): is the second largest shareholder of the company.
- Token owners receive passive income from Advertising & Gold Financial Trading.
- Involvement of the community in proceeds allocation of solidarity funds in major cities globally.

Our TaaS strategy help Nations and Corporate unlock wealth by keeping majority of their resources in ground, only extracting a portion for commercial use, thus preserving the environment and preserving wealth for future generations.

Mining Industry

Local mining communities need funding and know-how.

Supplying soft capital.

We pre-finance small scale and artisanal mines. In exchange, we receive gold at a discounted price.

Supplying Technology & Expertise.

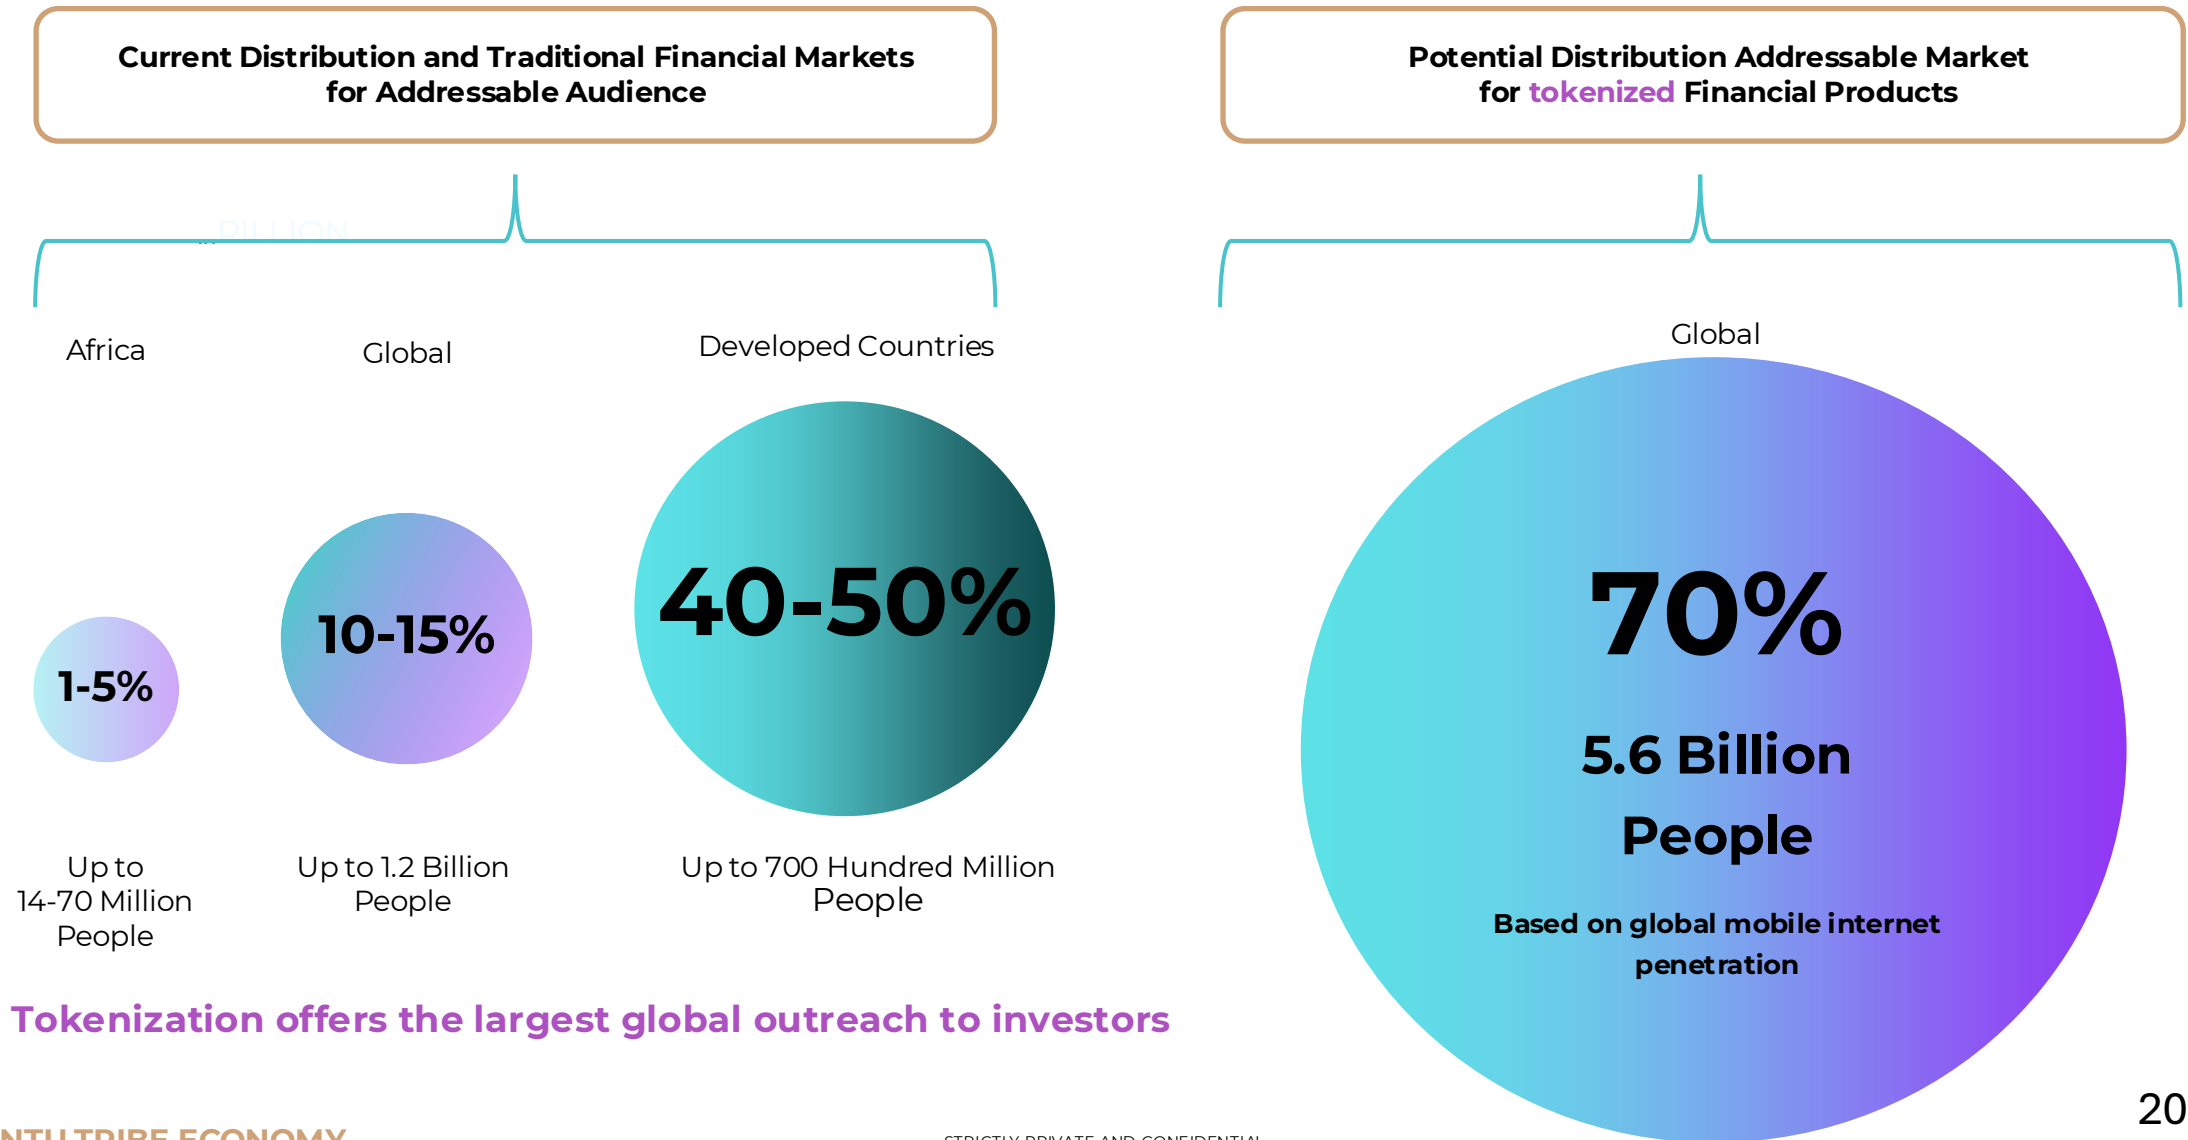

Our exclusive technologies increase extraction by up to 80% without using mercury. We work closely with geologists and lawyers to help provide a full suite of support for junior players.

Clean and Ethical Gold Extraction.

- Exclusive, clean technology - zero mercury.
- Higher yield enhancing gold technology (15% increased extraction volumes).

Market Potential: Tokenization, The silver bullet for financial inclusion?

RWAS TOKENIZATION: THE TRAIN HAS LEFT THE STATION (1)

Global institutions are already moving billions on-chain—and the market is scaling exponentially.

CENTRAL BANKS & GLOBAL FINANCIAL INSTITUTIONS ARE ALREADY TOKENIZING

- **140+ Central Banks** now exploring or deploying CBDCs (up from 90 in 2021).
- **Citi** uses smart contracts as digital bank guarantees and letters of credit.
- **HSBC** launched the **HSBC Gold Token** on Orion, now live in Hong Kong (2024).
- **J.P. Morgan** (Project Guardian): enabling wealth managers to trade tokenized assets across multiple blockchains.
- **Société Générale – FORGE** issued the first tokenized green bond for real-time settlement and traceability.

J.P.Morgan

Efficiency & Liquidity: tokenized Treasuries, private credit, and real estate outperform traditional rails.

Regulatory Clarity: Singapore MAS, UAE VARA, Hong Kong SFC creating secure, scalable frameworks.

**KEY DRIVERS
FUELING
ADOPTION**

Technology: L2s, ZK proofs, and cross-chain interoperability accelerating global reach.

DeFi Integration: RWAs now power on-chain yields and settlement rails.

Fractionalization: unlocking historically illiquid assets for retail + institutional demand.

RWA tokenization has grown more than 300% in the past 20 months, becoming one of the fastest-scaling segments in digital finance.

- Larry Fink

RWAS TOKENIZATION: THE TRAIN HAS LEFT THE STATION (2)

A multi-trillion-dollar asset class is being rebuilt on-chain.

RWA tokenization market:

- \$30B (2023) → \$0.6T (2025)
- \$1-2T (2030) (conservative)
- Up to \$16T (2030) in bullish scenarios
- \$18.9T by 2033 (Ripple x BCG midpoint)
- \$30.1T by 2034 (Standard Chartered)
- 10% of global GDP by 2037 (WEF)

Gold market cap at
\$14 Trillion.

Stablecoins grew
relative to VISA with
Institutional demand
for Real World Assets
("RWA") on the Rise.

Institutional Demand Surging

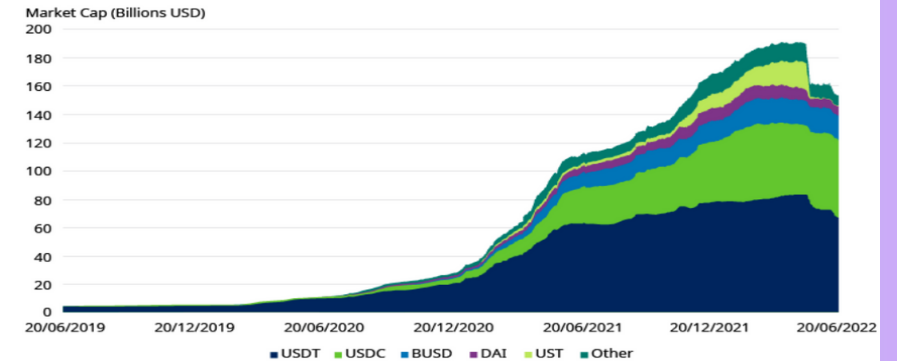

- Stablecoin settlement volume hit **\$1 trillion**, surpassing Mastercard & PayPal.

Market caps (Q1 2024):

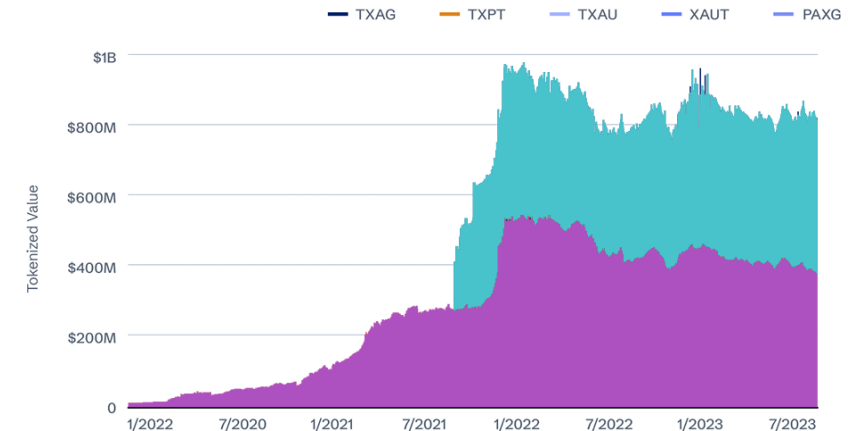

- **USDT: \$99B, USDC: \$27B, DAI: \$5.2B, FDUSD: \$2.3B, TUSD: \$1.8B**
- **Gold market cap: \$14T**, with increasing tokenized inflows (PAXG, XAUT, TXAU, etc.).

Real estate, Treasuries, private credit, and gold will dominate tokenization volumes.

Market cap of 10 largest stable coins – 2019 to 2022
Cumulative stablecoin market cap

Inflows into the Tokenized Commodities are increasing with nominal outflows.

WHAT THE FUTURE LOOKS LIKE

SCENARIO 1 The Bear Case

MACRO ENVIRONMENT

- Inflation anchored near central-bank targets
- Inflation anchored near central-bank targets
- Positive real interest rates persist
- No major geopolitical or financial shocks
- High confidence in fiat currencies and sovereign debt

MARKET-DRIVEN

- Yield-bearing assets remain attractive
- Risk premia compressed across markets
- Financial markets function smoothly, no stress signals

KEY ASSUMPTIONS

- Central bank gold purchases **decline materially** from recent highs
- Paper gold markets (futures, unallocated accounts) remain liquid and dominant
- No meaningful shift from paper claims to physical delivery

Gold remains range-bound, with upside capped by derivatives selling and downside protected by structural physical demand.

WHAT THE FUTURE LOOKS LIKE

SCENARIO 2 The Base CASE

MACRO ENVIRONMENT

- Inflation remains **above target**, but contained
- Real interest rates **hover around zero**
- Policymakers manage stress without resolving it
- No systemic crisis, but **persistent fragility**

MARKET-DRIVEN

- **Sustained central bank gold accumulation**, especially in EMs
- Investors hedge against slow erosion of fiat purchasing power
- Gold innovations (digital, allocated, tokenized) **reduce friction and broaden access**

KEY ASSUMPTIONS

- Central bank demand stays **structurally elevated**
- Paper and physical gold markets function without rupture
- Innovations enhance access without destabilizing market plumbing

Gold appreciates steadily through incremental gains, reaching new nominal highs with shallow pullbacks and moderate, controlled volatility.

WHAT THE FUTURE LOOKS LIKE

SCENARIO 3 The Bull CASE

MACRO ENVIRONMENT

- Severe **macroeconomic and/or geopolitical shock**
- Inflation becomes unanchored or policy credibility collapses
- **Deeply negative real interest rates**
- Loss of trust in fiat currencies and sovereign debt

MARKET-DRIVEN

- Global **flight to safety** and tangible assets
- Collapse of confidence in paper claims and financial intermediaries
- Gold regains status as **monetary collateral**, not just a hedge

KEY ASSUMPTIONS

- Central banks **accelerate gold accumulation** and may actively re-anchor currencies to gold
- Physical gold demand overwhelms paper markets
- Delivery stress exposes the gap between paper gold and physical supply

Gold breaks decisively out of its historical range, undergoing rapid non-linear repricing as panic hedging and physical scarcity drive premiums higher and reaffirm gold's role as a core monetary asset.

Executive Members

Mamadou Toure

Founder and CEO of Ubuntu Capital, Africa 2.0, Ubuntu Tribe.

Tech Entrepreneur and Systems Thinker

Formerly with KPMG, BNP Paribas Investment Banking, IFC (World Bank Group), and General Electric as Managing Director, leading Investments & Project Finance across Sub-Saharan Africa.

Involved in US\$ 25B+ in infrastructure, mining, banking, and agri-tech projects across Africa, the Middle East, and Europe.

Led early-stage investments at AFC, resulting in 3 unicorns and 1 listed on NYSE listing.

Founder of Ubuntu Group (Web3, Blockchain, AI, and Quantum Computing)

Awarded in Dubai for tech leadership; featured on CNN, Bloomberg, and BBC.

Forbes Top 10 Most Influential in Africa (2014), Top 30 Global Blockchain Leaders (2020), Top 5 Global Leader in Finance (EDHEC Ranking), Top 20 Web3 Influencer Graduate of Harvard Kennedy School and MIT Sloan (AI). Fluent in French, English, German, Spanish, and two African languages.

Oliver Lienhard

CTO and Co-Founder

Oliver is a business information scientist, blockchain and tokenization expert. He has more than 20 years of experience as IT architect and innovation manager.

He works and advises in the blockchain/fintech industry and was involved in various Blockchain projects and worked for IBM and Oracle.

Louis Sirico

Chief Information Officer - Info Systems

Louis Sirico is a seasoned CTO, patented AI inventor, and blockchain expert, currently leading technology at Fluidefi where he builds compliant digital asset and AI-driven blockchain analytics infrastructure.

Earlier in his career, he served as a Senior Software Engineer with the FBI, developing systems used in criminal investigations. With decades of experience across AI, IoT, and cybersecurity, he has advised global organizations and contributed as a technical expert to Bloomberg Law. He recently joined Ubuntu Tribe as CIO, supporting the development of next-generation tokenized financial infrastructure.

Executive Members

Lisa Loud

Chief Product Officer & Co-Lead
Global Business Development and
Founding Member

Lisa Loud is a fintech and digital assets executive with 15+ years of international experience across global technology and financial platforms. A former executive at Apple, PayPal, and BitMEX, she has led product strategy, go-to-market execution, global growth initiatives, and organizational scaling in complex, high-growth environments. Recognized for bridging large-scale Web2 platforms with emerging Web3 innovation, she is a frequent global speaker and advisor.

Lisa is a Founding Member of Ubuntu Tribe.

Gaël Angoula

Marketing & Growth Director and
Founding Member

Gaël leads the marketing and adoption strategy for GIFT and the UTribe Wallet.

Former founder of Growth Marketing AI, he built high-performance acquisition systems across sectors (tech, fintech, SaaS, services), Expert in growth marketing, automation, and large-scale adoption, he now deploys B2C and B2G go-to-market strategies, using channels tailored to African realities: USSD, WhatsApp, mobile money, social media, and e-learning.

Carine Umbel

Chief Operating Officer and
Founding Member

Carine brings over 15 years of experience in finance and fintech, having held senior roles in New York across banking, data and risk management, and digital innovation. She previously led Francophone Africa at Binance, a Top 3 global crypto exchange, where she played a key role in expanding crypto adoption and adoption across the continent.

At Ubuntu Tribe, she oversees global operations, strategic partnerships, and go-to-market execution across Africa, MENA, and Asia. Her strength lies in bridging global capital with inclusive digital infrastructure on the ground.

Business Development Team

Pascale Bartholomeeusen

Head Government Relations & Business Development Lead

Pascale has 10+ year experience in diplomacy as Attaché for the Federal Public Service

Foreign Affairs, Foreign Trade and Development Co-operation and 4+ year experience as an expert in domestic and international consulting, more especially Business Strategy.

Neelkanth Aher

India Business Development Lead

Neelkanth Aher is a dual-qualified Solicitor and Advocate before the Supreme Courts of India and England & Wales, with 15+ years of international experience in real estate, infrastructure, private banking, and cross-border transactions.

A specialist in blockchain and real-world asset tokenisation, he has advised corporates and governments across India, Europe, Africa, and the Middle East, and previously taught corporate and securities law at the National Law University.

Jimmy Ku

North America Business Development Lead

Jimmy Ku is a Silicon Valley venture partner and seasoned startup operator with deep experience in VC, growth strategy, and company building. He advises Millennia Capital, Modi Ventures, and 10X Capital, supporting investments in leading AI, fintech, and frontier-tech startups. A former Head of Growth at Flutterwave and COO at MixerBox, he has helped founders raise hundreds of millions in funding across multiple ventures. Known for his ecosystem leadership, Jimmy actively connects global founders, investors, and innovation communities.

Audrey Nesbitt

Business Development lead for the mining ecosystem in Canada

Audrey Nesbitt is a strategic advisor and operator with 20+ years of experience in fintech, tokenization, digital infrastructure, and the mining sector. Based in Canada, she works with founders, executives, and boards on strategy, market entry, and growth in regulated and capital-intensive industries.

At Ubuntu Tribe, she joins as Business Development lead for the mining ecosystem in Canada, leveraging her network to drive partnerships and ecosystem expansion. She is also a Board Member at Northstar Foundation.

Adam Funnell

Business Development lead for the UK and Europe

Adam Funnell is a business development and strategic partnerships expert with experience across structured finance, tokenization, and digital assets. He has worked with investment firms and Web3 companies on go-to-market strategy, product design, and institutional adoption, with a strong focus on compliance and scalability.

At Ubuntu Tribe, he joins as Business Development lead for the UK and Europe, supporting ecosystem growth, partnerships, and market expansion.

Let's make great things happen together!
